## Some questions for 1981, R.Reagan and team moving into White House.

How will we remember 1980 looking back years later?  
Is technology making the earth better?  
Why are so many things going wrong? Why so much suffering?  
Who are the people that dictate? What instruments do they use?  
How much power is really in their hands?  
How much weakness is our responsibility?  
Are dictators at fault? Do they give people what they want?  
Do we ever learn from errors of past histories?  
Will dependence upon computers and machines deprive us of our own ability to do for ourselves? Is speed a luxury?  
Is there any way out of the obvious direction we are headed?  
Is there any "pay-off" for staying alert, studying, knowing?  
Are you going to have a good year in 1981?  
Who will stop nuclear explosions, assassinations, war, mind experiments, torture, genocide, starvations, rape, arson, murders?
